NEWTON NURSERIES

NEWTON, MISSISSIPPI

February 1, 1920.

U. G. Department of Agriculty

Our catalogues for 1920 are completely exhausted and since it will require at least sixty days to get out a new one, we are offering only an abbreviated sheet giving a condensed description of our stock. The demand for catalogues has been greater this season than ever before and more business done than at any time in the history of our career as nurserymen.

Please send in your order at once as stock is going fast and many varieties are likely to become exhausted

any day.

As it is impossible to give a complete description of the different varieties in a small pamphlet like this we want to ask each customer, if you are not familiar with the varieties you ask for to leave the selection to us, as we grow all the best varieties in large quantities and will always give the best when the selection is left to us. We have been in the nursery business for thirty years and during that time have always maintained a reputation for honest dealing and upright principles. As to our integrity will refer you to the postmaster, express agent, cashier of Newton County bank or any business house in the town of Newton.

APPLES.

The varieties offered in this list have been selected from over one hundred different varieties tested on our own grounds.

Early Harvest-Large bright yellow; one of the

first to ripen.

Red June-Medium, deep red; oblong, tender, de-

licious flavor.

Early Red Margaret—Medium red, one of the best; ripens last of June.

Striped June-Medium red stripe, ripens last of

June.

Horse—One of the best known, ripening in July.

Raegan—Medium to large, red striped, tender, juicy and sweet; immense bearer, one of the best eating apples; ripens July and August, lasting six weeks.

Summer Queen—Large, red striped, yellow flesh,

fine flavor; a most desirable August apple.

Simmons—Large, red striped, sub-acid; ripens

last of August.

Bonum—Large, dark red, rich and delicious, ripens first of September.

September Red—Medium, red, yellow flesh, ripens last of September.

Yates—Medium, juicy, high flavor, ripens first of

October.

Newton—Medium, green, ripens in October.

Ford-Large, red striped, resembles the Ben Da-

vis, ripens in October.

Bill Arp—Large, red cheek, yellow flesh, tender and sweet. The finest apple for the South that we have ever fruited; ripens in October, keeps well.

PEACHES.

Early Wonder: (Neva Myss)—Medium, white, red cheek, very juicy, cling stone, earliest peach, ripens in May.

Mayflower—Medium, red, good quality, comes af-

ter Early Wonder.

Greensboro—Large, white, red cheek, ripens middle of June.

Alton-Large, delicate red cheek, melting juicy,

ripens in June.

Carmen—Large, white, blushing red cheek, delicious flavor. Last of June.

Bell of Georgia-Large, white, red cheek, white

flesh, excellent flavor, free stone; July.

Duggars Golden—Large yellow cling stone, red cheek, ripens middle of July.

General Lee—Large, oblong, creamy white, juicy and melting, cling stone. Middle to last of July.

Thurber—Large, white, juicy and delicate flesh, exceedingly fine, free stone. Middle of July.

ceedingly fine, free stone. Middle of July.

Elberta—Very large, golden yellow, too well known to need description.

Gilbert—Large, white, free stone, red cheek,

August first.

September—Large, yellow, red cheek, cling stone, last of August and first of September.

Hudson's October-Large, oblong, white, red cheek

ripens in October.

The description of peaches is very condensed but varieties are the best from 25 years testing.

PLUMS.

Red June-Medium to large, deep red. The first

to ripen in June.

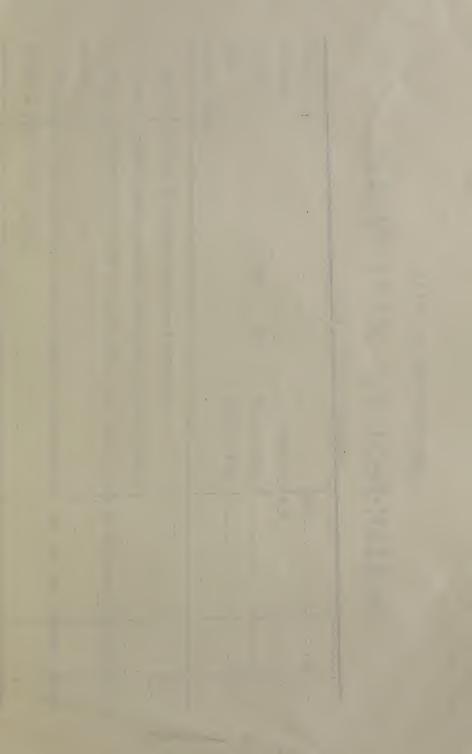

Abundance—Large, heart shaped, yellow, splotched with bright red; the richest flavored plum known. Last of June.

Wild Goose—Large, bright red. A fine fruit, comes in June.

Excelsior—Medium, red, juicy, the surest bearer known, middle of June.

Terrell—Very large, deep red, a splendid plum.

June.

NEWTON, MISS.

Postoffice				
	······································			

Leconte-Large, yellow, ripens in August.

Garber—Large, juicy and sweet, lasts through September.

Keiffer-Very large, with bright cheek, ripens

throughout October.

Chinese Sand—Large, yellow; fine for cooking and preserving. Tree has never been known to blight. The demand for this pear continues to increase; will ripen through October.

PECANS.

Stuart—Nuts very large, paper shell; kernel full and plump, of finest quality. One of the finest pecans known.

Success-Very large, paper shell, resembles

Stuart; growing in popularity.

Japan Walnuts—A medium size walnut with large kernel; trees do well in the south.

MULBERRIES.

Hick's Everbearing—Large, black, ripens from May till August.

Dawning's Everbearing-Large, black, lasts about

two months.

FIGS.

Lemon's—Large, yellow, lemon color; a fine and desirable fruit.

Celestial—Medium, brown, sweet; most delicious

of all for preserving and canning.

GRAPES.

Moore's Early—Medium, black, sweet and tender, earliest to ripen.

Concord—Large, black, most reliable and profit

able for general cultivation.

Niagara—Large, white, good quality.

Brighton's—Medium, red, sweet and delicious.

Ive's Seedling—Medium, black, very hardy, good wine grape.

All the above grapes ripen in July.

BALLACE OR MUSCADINE GRAPES.

Scuppernong—Large, color brown, ripens in August. Too well known for further description.

James—Large, black, sweet; of the most delicious flavor, ripens throughout October. Everyone should have a vine of this type.

STRAWBERRIES.

Lady Thompson—Very large, sweet and juicy; lasts six to eight weeks. The best berry for family use.

Klondyke-Large, deep red, good for shipping,but

not equal to Lady Thompson for family use

Carolina Poplar—A rapid growing shade tree, very much resembles the native Cotton Wood.

Lombardy Poplar—A tall rapid growing tree,

very hardy. Makes sa hade in a few years...

Silver Leaf Maple—Foliage bright green, silvery white underneath. Makes a quick and desirable shade.

Umbrella China—A low wide spreading tree. Makes a dense shade. Known everywhere, does well on any soil.

Magnolia—A large broad leaf, evergreen. A native Mississippi tree. The most ornamental of all

evergreen trees.

Crepe Myrtle—Offer the following varieties: Crimson pink, purple and white. A very ornamental shrub.

HEDGE.

Amoor River—The true variety, far surpasses all evergreen Privet, for the south. This is the most popular of all hedge; planted one foot apart. Have an unusual stock of very fine hedge; can furnish it in large quantities.

ROSES.

We offer nothing but budded and grafted roses, which are far superior to those rgown on their own stocks.

Marechal Neil—Deep yellow, richer color and stronger when grafted. We recommend this above all climbing roses.

Rein Marie Henriette-Bright red, fine buds. A

very desirable climbing rose.

Climbing Kaiserine—Pure white, long pointed buds, the finest white rose for the south.

Louis Phillippe-A most beautiful red rose.

Blooms almost continually.

Safrano—Deep yellow, fine pointed bud, beautiful blush, heavy and constant.

Bon Silene—Pink, of a most beautiful shape;

buds fine.

Paul Neyron—The best pink hybrid perpetual bloomer grown in the south. The largest rose known.

American Beauty—Rich red, passing to crimson.

Baby Rambler—Brilliant ruby red, a profuse bloomer.
